Westbridge Receives California Approval for its New SUPPRESS® Herbicide EC

Vista, CA Westbridge Agricultural Products announced today that California Department of Pesticide Regulation (CA DPR) has approved **SUPPRESS® Herbicide EC**, EPA Reg. No. 51517-9, for use in California. **SUPPRESS® Herbicide EC** is a highly effective new tool for organic growers. It is registered as a broad spectrum contact herbicide for post-emergent, non-selective weed control for use in and around all food and non-food crops. Westbridge's proprietary formulation is an emulsifiable concentrate that has been approved by the Organic Materials Review Institute (OMRI) for use in organic food production.

In over four years of university research and field trials, **SUPPRESS® Herbicide EC** demonstrates excellent results in controlling various weeds. The low-foaming, easy-to-use formulation provides rapid, effective weed control, even in cooler weather conditions, and it will not volatilize.

Westbridge president, Tina Koenemann, says, “**SUPPRESS® Herbicide EC** is an important tool to help organic growers meet their production goals, and it is an excellent option for conventional growers to use as a rotational herbicide where weeds have become resistant to other chemical herbicides.”

Westbridge Agricultural Products is a leading manufacturer and distributor of effective liquid organic fertilizers, biopesticides and specialty inputs. From its TRIGGRR®, Organic BioLink®, Earthtrend® and SUNBurst® brands to Botector® and Blossom Protect™ biopesticides, Westbridge provides a portfolio of high quality products that offer solutions to growers facing challenges in disease control, pest resistance and nutrient management.

For questions about **SUPPRESS® Herbicide EC** or the Westbridge product line, please call (800) 876-2767 or visit www.westbridge.com.
