PRODUCT INFORMATION

Earthtrend Cal Plus is a liquid plant food containing calcium, which is essential for membrane permeability and for promoting root and leaf development and overall plant vigor.

Earthtrend Cal Plus is completely water soluble for improved nutrient availability and uptake by plant roots and leaves, and to provide a fast method of boosting plants under calcium deficiency stress.

Earthtrend Cal Plus can be applied to all crops including vegetables, fruit trees and vines, tree nuts, flowering and ornamental trees and shrubs, flowers, containerized plants, lawns and turf. Apply as a soil drench or a foliar spray.

Earthtrend Cal Plus may not be compatible with phosphate fertilizers.

Earthtrend Cal Plus can also be used to leach sodium from soils and correct salinic irrigation water.
