PRODUCT INFORMATION

Organic BioLink® Moly4 is a liquid molybdenum product complexed with amino acids for improved availability and uptake by the plants. It provides a quick boost to plants under nutrient stress and corrects molybdenum deficiencies. Plants lacking molybdenum deficiencies tend to show some yellowish or white areas between the veins.

Organic BioLink® Moly4 is ideal for use in sandy and acidic soils because they contain less available molybdenum for plant growth.

Organic BioLink® Moly4 can be applied to all food and non-food crops such as brassica (cole), berries, citrus, cucurbits, field vegetables, fruiting vegetables, fruit trees, grapes (raisin, table and wine), leafy vegetables, root and tuber vegetables, row crops, strawberries, tree nuts, ornamental trees, shrubs, flowers, containerized plants, lawns and turf.

DIRECTIONS FOR USE

SHAKE VIGOROUSLY BEFORE USING.

CAUTION: This product is to be used only on plants which respond to molybdenum. Crops high in molybdenum are toxic to grazing animals (ruminants).

Organic BioLink® Moly4 can be applied by ground or aerial application. Use sufficient water for thorough and uniform coverage of foliage or soil.

Foliar Application: 1 to 8 ounces per acre. Apply to plant foliage to point of run-off, throughout growing season as needed.

Soil Application: 1 to 2 pints per acre. Apply in irrigation water, including drip and sprinklers.

Nursery & Container: 1 to 2 oz per 100 gallons of water. Apply to plant foliage run-off or as a soil drench around base of plants. Repeat applications as needed.

Compatibility: Always conduct a compatibility jar test before mixing **Organic BioLink® Moly4** with new products.

NOTICE: Perform a phytotoxicity test on a small plot before large-scale application. To lower the risk of phytotoxicity, applications should be made early morning or late evening.

Use best management and cultural practices when applying **Organic BioLink® Moly4**. Use additional fertilizers as needed based on soil and tissue testing.

STORAGE & DISPOSAL

Store in original container under direct sunlight. Triple rinse and puncture empty container. Dispose of contents and container according to local, state and federal regulations only.
