DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirement specific to your State or Tribe, consult the State/Tribal agency responsible for the pesticide regulation.

Apply **SUPPRESS® Herbicide EC** when unwanted vegetation needs to be removed and crops have stopped growing. Spray solution as a broadcast application over targeted crops and weeds. Avoid spray drift to adjacent crops. To ensure full burndown, apply **SUPPRESS® Herbicide EC** at least 48 hours before harvest. Application crops include pulse, potato, and other tubers.

APPLICATION RATES: Use the lower use rate range for young, succulent and actively growing weeds and the higher rate for weeds greater than six inches in height. Use the highest rate for perennial weeds when the plants have “hardened.”

- Use a 3% solution for control of annual weeds.
- Use a 6% solution for burndown of perennial herbaceous plants, weeds in a later stage of growth and [to control sucker* growth. *Not for use to control sucker growth in California]
- Use a 9% solution when maximum vegetative burndown (for weeds such as field bindweeds and sedges), edging, or foliar trimming is desired.

Desired Volume of Spray Solution (gallons of Water)	Amount of SUPPRESS® Herbicide EC Per Volume of Water (Volume/ Volume)		
	3% Solution	6% Solution	9% Solution
1	4 fl oz	8 fl oz	12 fl oz
3	12 fl oz	24 fl oz	36 fl oz
25	96 fl oz	1.5 gal	2.25 gal
50	1.5 gal	3 gal	4.5 gal
70	2.1 gal	4.2 gal	6.3 gal
100	3 gal	6 gal	9 gal

SUPPLEMENTAL LABEL

MIXING INSTRUCTIONS: Fill sprayer tank with half of the recommended water, then add the appropriate amount of **SUPPRESS® Herbicide EC**. Fill tank with the remaining amount of water. When spraying the solution, **USE CONTINUOUS AGITATION UNTIL ALL SPRAY SOLUTION HAS BEEN APPLIED**. Apply spray solution in properly maintained and calibrated equipment capable of delivering the desired volumes. Apply spray solution as needed to control newly emerged weeds. Use spray solution within 4 hours of mixing.

Spray water pH: For spray water with pH greater than 7, adjust to pH 6 or below prior to the addition of **SUPPRESS® Herbicide EC**. The dilution water can be adjusted using an acidifier such as **BioLink® Acidifier**.

Surfactants: Do not tank mix **SUPPRESS® Herbicide** with silicone-based surfactants. Non-ionic surfactants are not recommended.

SPRAY EQUIPMENT: Apply **SUPPRESS® Herbicide EC** using hand-held equipment, boom sprayers, pressure sprayers, and hose-end sprayers. Only protected handlers may be in the application area. Always clean application equipment, including o-rings, thoroughly after each use. Do not apply this product by aerial application. Do not apply when wind conditions favor movement of spray away from the site of application. Avoid spray drift to non-target plants when using electrostatic sprayers. When applying this product in a broadcast application, utilize a hooded sprayer, shielded or other spray equipment that prevents the movement of spray away from the target weeds. Utilize nozzles that are designed to produce large spray droplets to prevent drift onto crop.

DO NOT APPLY THIS PRODUCT THROUGH ANY TYPE OF IRRIGATION SYSTEM.

ADDITIONAL PRECAUTIONS: Do not apply to weeds when wet from dew, rain or water. Do not water within 4 hours after application. Do not apply if rainfall is expected within 4 hours of spray. For maximum burndown, complete coverage is necessary.
