

CUCURBIT PROGRAM

ORGANIC TRIGGRR® **ORGANIC BIOLINK®**

CUCURBIT PROGRAM BENEFITS

Improves root and plant vigor which can lead to:

- Enhanced starter and pre-plant fertilizer efficiency
- Improved quality, color, uniformity, and yield
- Improved flowering and fruit set
- Improved vine vigor for multiple harvests

For use on all cucurbit varieties, including:

Cucumbers, pumpkins, squash, melons

SOIL* APPLICATION RATES

The soil application consists of the following products:

- Organic TRIGGRR®: 16-32 oz/A
- Organic BioLink® Cal-N: 1-2 qts/A
- Organic BioLink® 3-3-3 Fertilizer: 1-2 qts/A

To correct micronutrient deficiencies add:

- Organic BioLink® Micronutrient Fertilizer: 1-2 qts/A

FOLIAR** APPLICATION RATES

The foliar application consists of the following products:

- Organic TRIGGRR®: 16 oz/A
- Organic BioLink® Cal-N: 1 qt/A
- Organic BioLink® 3-3-3 Fertilizer: 1 qt/A

To correct micronutrient deficiencies add:

- Organic BioLink® Micronutrient Fertilizer: 1 qt/A

APPLICATION TIMINGS

First application

- A. Apply as a soil* application with starter fertilizer in transplant water.
- B. Chemigate soil* application of the cucurbit program into soil at first irrigation.
- C. A soil* application of the cucurbit program may also be knifed into the side of the bed at first emergence.

Post-emergent

Apply a soil* application or foliar** application of the program as the first two leaves begin to form.

Before lay-by or when plants grow runners

Apply a soil* application by side-dressing or through the drip system.

Between 2nd and 3rd open female flower

Band a foliar** application over the row. Repeat application at 4th to 5th and 6th to 7th female flower to increase fruit set.

Additional Application Information: Recommended program is compatible with most pesticides and fertilizers. Conduct a jar compatibility test prior to tank mixing the program with any untested tank mix combinations. The spray water for all applications should be acidified to a pH of 5 to 6. Always follow use directions on container labels before using these products.

Supplemental Information: Applications of the program may require adjustments in fertility and irrigation practices. Use best management and best use practices when applying these products. The program should be used as part of a complete fertility program.
