

BLUEBERRY PROGRAM

ORGANIC **TRIGGRR**® ORGANIC **BIO LINK**®

BLUEBERRY PROGRAM BENEFITS

Improves plant vigor which can lead to:

- Increased early seedling vigor and improved root growth
- Improved berry quality, uniformity and size
- Increased set and yield

SOIL* APPLICATION RATES

The soil application consists of the following products:

- Organic TRIGGRR®: 4 oz/A
- Organic BioLink® Cal Plus 6%: 1-2 qts/A
- Organic BioLink® 3-3-3 Fertilizer: 1-2 qts/A
- Organic BioLink® 3-0-0 Fertilizer: 1-2 qts/A

To correct micronutrient deficiencies add:

- Organic BioLink® Micronutrient Fertilizer: 8-64 oz/A

To help with acidification and reduce pH in water add:

- Organic BioLink® Acidifier: 1 gal/A in the last hour of irrigation.

APPLICATION TIMINGS

Apply a soil application of the blueberry program every two weeks throughout the season.

Transplant

Apply Organic TRIGGRR® solution of 8 fluid ounces per 100 gallons of water for up to 6 hours before transplanting.

Additional Application Information: Recommended program is compatible with most pesticides and fertilizers. Conduct a jar compatibility test prior to tank mixing the program with any untested tank mix combinations. The spray water for all applications should be acidified to a pH of 5 to 6. Always follow use directions on container labels before using these products.

Supplemental Information: Applications of the program may require adjustments in fertility and irrigation practices. Use best management and best use practices when applying these products. The recommended program should be used as part of a complete fertility program. For more information, contact Westbridge Agricultural Products at (800) 876-2767.
